EDUCATION

University of North Dakota

B.S. Computer Science, Minor in Cybersecurity

Grand Forks, ND
Expected May 2029

- **GPA:** 3.9/4.0 | **Honors:** President's List, Dean's List
- **Relevant Coursework:** Algorithms & Data Structures, Discrete Mathematics, Programming Languages, Statistics

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++, SQL

Frameworks & Libraries: React Native, Expo, TanStack Query

Backend & Cloud: Supabase (PostgreSQL, Auth, Row Level Security, Edge Functions), REST APIs, Claude API

Tools: Git, GitHub, Claude Code, EAS Build, TestFlight, App Store Connect

PROJECTS

Rust Strength – Strength Training App | TypeScript, React Native, Expo, Supabase | [App Store](#)

2026

- Launched on the iOS App Store a workout tracker with a workout generator and social feed after a TestFlight beta in which 10 users logged 100+ workouts
- Engineered a custom progressive-overload algorithm that recommends weights from each user's training history
- Designed the PostgreSQL data model and an offline-first sync strategy with TanStack Query so workouts can be logged without a connection
- Built a friends feed on Supabase Auth with privacy enforced in the database via Row Level Security policies, including a user opt-out for sharing sessions
- Directed AI-assisted development with Claude Code: owned architecture and data design, reviewed generated code, and led debugging and testing

Shelfsmith – AI Pantry & Grocery App | TypeScript, React Native, Expo, Supabase, Claude API

2026

- Building a pantry and grocery app where each household shares a live-updating pantry and shopping list; in TestFlight beta with 5 testers
- Built an AI receipt scanner on the Claude API behind a Supabase Edge Function that verifies each caller and keeps the API key off the device
- Wrote a SQL matching engine that ranks recipes a household can cook now or is 1–2 ingredients away from
- Cut AI cost per scan by ~60% by measuring real usage and switching to a smaller model, made safe by a user review step
- Wrote database tests that run every migration and verify Row Level Security policies as real signed-in users

WORK EXPERIENCE

Opp Construction

Jun 2026 – Sep 2026

Dump Truck Driver (Class A CDL)

- Hauled material for asphalt paving and concrete removal crews, working 60–80 hour weeks

CHS

Apr 2026 – Jun 2026

Semi Truck Driver (Class A CDL)

- Hauled dry fertilizer to supply spring spreading operations during the busiest season for area farmers

American Woods

Jan 2026 – Apr 2026

CNC Machine Operator (Part-Time)

- Operated CNC mills and Biesse Rover machines to produce precision furniture parts while enrolled full-time

LEADERSHIP & ACTIVITIES

UND Artificial Intelligence Association | Member

Sep 2026 – Present

UND Cyber Hawks | Member

Sep 2026 – Present

North Dakota Boys State

2024

Governor; Senator

- Elected Governor by ~100 delegates and signed 10+ bills into law; previously served as Senator
